NUMBER 34

Antioch Will Install Parking Meters on Downtown Streets

Contract is Signed With Duncan Meter for Delivery in Early Summer

Antioch will have parking meters. The village board meeting in special session Friday night contracted with the Duncan Parking Meter Co. to install meters and it is expected that the work will be completed in early summer.

The decision to install the parking meters in Antioch was made unanimously, and it was also decided to limit parking to two hours with each coin.

The meters will cost \$75 each and the contract for a gradual payment through income. Twenty-five cents a month a meter is allowed for maintenance each month, and beyond that the village and the company divide 75 per cent for the company and 25 per cent for the village until the meters are paid for.

There will be parallel parking on the east side and angle parking on the west side of Main St., where most of the meters will be placed.

The angle at which cars are parked on the west side of Main street will also be changed from the 45 degree angle now used to about 30 degrees. This is expected to make it easier to park and back out from the curb. As the angles are now, the front door of most cars strikes the car adjacent, and it is believed that the change of angle will remedy this.

A representative of the Duncan company will come to the village soon to measure parking distances and plot the meters. It is estimated that 100 will be procured.

Adoption of meters which will be like those used in Waukegan, is not as a matter of revenue but to provide parking for out-of-town shoppers, it is said. It will necessitate parking at a greater distance from the business district for business men and employees but will increase business.

Future Farmer Chapter To Hold Annual Banquet At High School April 3

The Future Farmers, members of the vocational agriculture department of the Antioch township high school, are to hold their twenty-first annual father and son banquet next Thursday evening, April 3rd at 7:30 p. m.

W. D. Knox, associate editor of the Hoard's Dairyman of Fort Atkinson, Wisconsin, will be the main speaker. In addition there will be talks and musical selections by members of the organization. A movie will also be shown for entertainment.

Invitations to the event have gone out to all present members, alumni of the department, and to the fathers of the two groups. Any alumni of the chapter, who have been overlooked should get in touch with C. L. Kutli, advisor of the group, if they wish to attend.

Another feature of the event will be the presentation of awards.

New Benefit Year For Jobless Pay Begins March 29

Beginning Saturday, March 29, claims for unemployment compensation will be based on wages received in 1946. State Director of Labor Robert L. Gordon, reminded Illinois workers today. All unused wage credits based on wages received in 1945 expire automatically with the end of the current benefit year on Friday, March 28.

"To be eligible for unemployment compensation while involuntarily out of work between now and April 1, 1948, a worker must have been paid wages amounting to at least \$225 during the calendar year 1946," Director Gordon said. "These wages," he explained, "must have been for work covered by the Illinois Unemployment Compensation Act, which means, generally, with Illinois employers of six or more persons, or with employers subject to the Federal Unemployment Tax regardless of the number of Illinois employees."

Minimum \$10 a Week
For total unemployment, the Illinois law provides weekly benefits of not less than \$10 nor more than \$20. The minimum total amount payable under the law is ten times the weekly benefit amount, the maximum, twenty-six times. Both claimant's insured wages in the base period year.

P. T. A. Dance Saturday Night at Grade School Will Be for Everybody

One doesn't have to be a parent to get in on the Parent-Teacher club dance at the Antioch grade school Saturday night, officials of the organization announced today.

The event will be public and the more people that come the more pleased the club will be.

Mrs. Henry Rentner, Mrs. Alma Hardin and Mrs. Elmer Baethke comprise the committee in charge.

The early part of the evening will be given over to cards and there will be tables for five hundred, pinocle, bridge and buncio, with prizes for each table.

Music for dancing will be provided by Bessie Barnes orchestra.

Fire Dept. Sees First Plans For New Fire House

Committee Appointed to Investigate Purchase of New Truck; Plan for Dance

The first floor plans for the new fire house, which is to be a part of Antioch's municipal building, were shown at a meeting of the department Tuesday evening. Members of the department were pleased with the suggested layout, although several changes were suggested in minor details. On the whole the plans were pronounced satisfactory. The blueprints covered the firehouse only, and call for the building to be 38 feet 10 inches wide and 40 feet deep on the inside, which will provide plenty of room for housing three pieces of equipment.

The trucks require about twenty-eight feet of depth in the station and the additional space will be taken up by storage space for other equipment. The building will have a full basement which will be equipped with a kitchen and recreation room which will be used for fire meetings.

The building committee will meet with the village board at the next regular meeting to see the complete plans for the building and assist the village authorities in every way possible to get the station erected as soon as possible.

Committee to Work on New Truck
A committee composed of Chief Cleve Vos, Chief Engineer Hunter, Ed Frazier, Laurel Van Patten, President Edgar Simonsen and Secretary Clarence Shultis, was appointed to investigate the possibilities concerning the placing of an order for a new fire truck. Financing of the new truck has been partly taken care of by the setting aside by the village board of sums of money each year during the past, and it is believed that money now in the fund will be almost sufficient for purchase of the truck. The committee will study proposals of all companies who can be interested in building the truck and will make a recommendation to the department after which the information and recommendations will be presented to the village board for their consideration and action.

It is believed that due to production difficulties, a considerable time will elapse before delivery of the new truck even after the order can be placed. Estimates of the time required to get the truck in service vary from six months to two years or more. For this reason members of the department are urging that the order be placed as soon as possible.

Plan For Dance
Other business at the meeting included reports of the dance committee which reported that all is in readiness for the dance April 12. Joey Kutzler of Waukegan has been secured to furnish the music. The Legion hall has been rented and entertainments of various sorts will be provided for.

Shultis reported that no fire calls had been received since last Thursday.

Mrs. Kral's Brother Dies
Henry Wilken, of Chicago, brother of Mrs. Emily Kral, of Antioch, died at his home in Chicago, Monday, following a months illness. Funeral services were held today from the Lain Funeral home. Burial was in Rosehill cemetery. Mrs. Kral and her son-in-law, Homer La Plant attended the services.

GIRL BORN TO GIBSONS
Mary Agnes is the name of a girl baby, born Saturday to Mr. and Mrs. Carl Gibson at St. Therese hospital. Mrs. Gibson and baby are well and are to come home from the hospital Sunday.

High School District 117 Will Vote Saturday On Student Transportation

Members of the Antioch Township High school board were hoping today for a large turnout of voters at the referendum Saturday so that they may have a clear cut decision whether to institute bus service for high school students or not.

While a bare majority will decide, the board will be greatly satisfied if the decision is from a large percentage of the voters. W. K. Hills, president of the board said.

Voting will be from noon until 7 p. m. at the high school and at the Lake Villa grade school.

The referendum question doesn't mention buses, but merely asks whether the tax levy shall be increased a half mill for educational purposes. It is understood, however, that the added revenue will be for bus service only and whether the board will decide to distribute the expense by merely buying one bus and leasing two others the first year is a matter that will be considered after the vote is taken.

Most of the other township high schools in Lake County have buses or other public means of transportation.

Extra Bleacher Seats To Provide for Crowd At Red Cross Benefit

Meister Brau Bowlers Expected to Attract Many On Saturday Night

Preparations to handle a large crowd at the Antioch Recreation room Saturday evening when the Meister Brau crack bowling team from Chicago will bowl Antioch's best in an exhibition match for the benefit of the Red Cross.

Center lanes only will be used and the rest of the space at the sides will be floored for bleachers, making possible the seating of 300 persons.

There will be no admission charge, but collection will be taken for the Red Cross fund. The committee in charge is asking that the crowd be as liberal as possible because of the shortage in the general fund thus far.

The Meister Brau team will include all first-string members, among them being Paul Kruske, Harry Lippe, Bud Wright, Harry Ledene, Jr., Joe Sinke and Eli Marelich. All have season averages from 206 to 225, with each having at least three 300 games to their credit.

Pitted against them are the following local men: Ray Quadenfeld, Don Bauer, Henry Pape, Dick Stroner E. (Swede) Peterson, and Al Keulman.

Play will start at 8 o'clock and those coming early will get the better seats.

Legion Auxiliary Plans Regular Social Meeting; To Make Student Loans

The American Legion auxiliary will hold its regular social meeting at the Legion home on Ida ave., at 8 p. m. tomorrow with Mrs. E. Swenson in charge as chairman of the committee.

Mrs. Rose Kennedy, president of the chapter announced that student loans to needy children of veterans are now available and may be obtained through application to Mrs. Myrtle Klass, chairman of the committee on education of orphans of veterans and of loans.

The loans are made through the state department and are offered at the following educational institutions:

Bradley Polytechnic institute, Illinois college, Illinois Wesleyan, Knox college, Lewis institute, Monmouth college, Northwestern university, the University of Chicago and the University of Illinois.

Easter gifts consisting of tee shirts, handkerchiefs, socks and bill folds will be presented to 15,000 hospitalized ex-service men in Illinois' 25 hospitals next week.

Episcopal Church Will Light Paschal Candle

The Paschal candle will be lighted at the Episcopal church the Saturday before Easter and maintained until May 15, Ascension Day, the Rev. E. W. Strauser, pastor of the church announced.

Greek Orthodox church members were invited to participate and light their candles from this one.

Fire Damages Jensen Home On Park Ave. This Morning at 10:30

Prompt action on the part of the Antioch Fire department averted a large loss at the home of Mrs. N. C. Jensen on Park Avenue this morning when the house broke into flames at about 10:30 a. m. The fire, which is believed to have started on a porch at the rear of the house, had traveled up the outside wall on the south and east sides of the house, and had broken through the roof into the attic in several places.

The flames were quickly quenched on the outside of the house by use of the small line and 500 gallons of water on the new pumper, meanwhile the old truck was hooked to a hydrant to supply more water. The fire was completely extinguished in about 15 minutes.

Chief Cleve Vos estimated the damage at about \$2500.00 to the building and \$500 to the contents. The loss is partially covered by insurance.

Some difficulty was experienced in getting the old pumper into action due to the leaky condition of the pump and the age of the other equipment. The suction line used on the old truck broke when it was put into service and had to be replaced. Vos said that the department had been hesitant to put repairs of any great cost into the old truck since it was so obsolete and "worn out." This especially since the department plans to replace it if possible at the earliest moment. Vos said that the truck was so old that replacement of the parts needed would be impossible and the cost would be prohibitive.

Because the Jensen household has no men, members of the department are at the scene of the fire this afternoon cleaning up, closing up damaged windows and generally getting the house in a livable condition. A large waterproof canvas will be put on the roof to cover the holes burned through and a temporary heating plant will be installed to heat the house until the regular furnace can be put into service.

William Petersen, 52, Lake Villa Road Man, Dies of Heart Attack

William Petersen, aged 52, of Lake Villa, employee of the state highway department, died of a heart attack Monday while clearing snow from Grand Ave. near Sand Lake road.

Sidney Barnstable, Lake Villa, Petersen's companion in the state truck, said that Petersen complained of a sudden pain in his arm and a short time later slumped over the wheel of the truck.

He said that he made his way in the storm to the nearest telephone and called Petersen's family and the state highway department, and a passing motorist called the sheriff's office and the Antioch Rescue squad.

The rescue squad pronounced him dead on their arrival. Death was due to heart disease.

A resident of Antioch before going to Lake Villa 34 years ago, Petersen had been employed the last two years in highway maintenance.

He is survived by his wife, Florence two sons, William and Thomas of Lake Villa, and four daughters, Mrs. Luella Pullen, Gurnee, and Marjorie, Genevieve, and Mary, all of Lake Villa.

Also surviving are two grandchildren, a brother Henry, of Lake Villa, and five sisters, Mrs. M. Schart, Racine, Mrs. Rena Gerber, Lake Villa, Mrs. Lulu Bruckner, Waukegan, Mrs. Caroline Weiborn, Waterford, Wis., and Mrs. Eleanor Telz, Chicago.

The funeral service was held at 2 p. m. at the Strang funeral home with burial in Angola cemetery, Lake Villa.

Antioch Women Attended Conference in Chicago

Mrs. Maude Johnson, Mrs. Deborah Van Patten and Mrs. Evelyn Frazier attended the Nineteenth Patriotic conference held in the Palmer House, Chicago Monday.

Approximately 1,000 representatives from the 750 units of the American Legion auxiliary, department of Illinois, were present.

Highlights of the days program were a talk by Clifton Utley, widely known radio commentator on the subject "Two Worlds," and entertainment by Mark Love, radio and opera star, the subject of which was "The Romance of Uncle Sam."

Makes Eighth Payment
The State Bank of Antioch announced the eighth 10 per cent payment on its deferred certificates this week. This disbursement will be available on or after April 1.

Antioch Also Will Adopt Daylight Savings Time

The village of Antioch will adopt daylight savings time April 27, the same time that Chicago does, President George B. Bartlett of the village board, announced.

The board in making this decision also decided to meet on Wednesday, April 2 instead of Tuesday of that week because of the town election.

Burglars Get \$300 Haul At Antioch Recreation

A burglar or two broke into the Antioch Recreation room in the early hours Saturday morning and rifled the cash register and two slot machines of a sum estimated at \$300.

A crow bar was used in prying open the back door of the bowling alley on Main St., in gaining entrance, and the thief had little trouble in getting the money from the cash register which was unlocked, and two of the three slot machines.

Carl Gibson, who handles the firm's money, was in Waukegan where Mrs. Gibson gave birth to a daughter at St. Therese hospital. His brother, Charles, left the place about 2 a. m. but did not remove the money from the register as was the custom. The robbery occurred between then and daylight.

High School Board Plans To Construct Baseball Diamond East of Tracks

Use of Ground for County Fair to be Sought at Next Meeting

Construction of a baseball diamond on five acres of land east of the Soc line tracks near the Antioch Township High school with a view of instituting baseball as a high school sport is planned by the school board. W. K. Hills, president, announced.

The ground was surveyed and seeded some time ago and is perfect condition now for a ball ground, he said.

The diamond would not only be available for the school, but to the community in general during the summer. Hills intimated and the same provisions will be made as for the softball grounds back of the school building.

Final decision on the matter will be made at the next board meeting. The board at that time also will take under consideration the use of the same grounds by the Lake County Fair association. The association would like to have the fair in Antioch as has been the custom and would like the use of the ground east of the tracks and along Rte. 173.

Al. Schmidt Attends Barn Planning Meet

Al Schmidt, of Schmidt Implement Co., Salem, Wisconsin, returned recently from Fort Atkinson, Wis., where he attended a Jamesway barn clinic. "It was a very interesting and instructive session," Mr. Schmidt reported. "Most of the time was given over to the subject of remodeling old barns to make them handier and more profitable for their owners." Mr. Schmidt pointed out that until materials and labor are more plentiful, the remodeling and renovating of existing farm buildings will probably far exceed new construction during the next few years.

Schmidt Implement Co., handles the Jamesway line of barn equipment manufactured by the James Mfg. Co., designers and planners of farm buildings since 1906.

Men To Be Hosts at Card Party Saturday Eve. at Channel Lake

Saturday, March 29th, promises to be an interesting and profitable evening for those who attend the card party and dance at the Channel Lake school. The men of the Channel Lake Community club have been elected to furnish prizes, serve refreshments and wash dishes.

Proceeds of the party will go into the school's hot lunch program. The club is attempting to make up the deficit anticipated when federal and state contributions are cut off.

Turkey sandwiches are being provided by the committee consisting of James Van Cura, Richard Seyfarth, William Terry, Thomas Runyard, Vern Heath, Charles Dorweiler and John Hojem.

Interest Is Low In Town Election Set for April 1

Little interest is being shown in the April 1 Town election which will see a supervisor, one justice of the peace, road commissioner and two library trustees placed in office.

Only in the supervisor race is there competition with the veteran William A. Rosing opposed by Arthur Palenske. Rosing has held the office for the past four years being elected when Barney Naber declined to run for re-election in 1943. At that time Rosing defeated two strong candidates, Louis Pregenzer and Fred Berg. Rosing also held the office from 1925 to 1931. Rosing's record of service to the township while a member of the board of supervisors includes membership on the important buildings and grounds committee and the judiciary committee. His work has also been outstanding as town health officer and as township postmaster. To Rosing's credit also is the fact that although he represents one of the richest townships in the county, he has made no effort to have an increase made in his salary, and since increases in salary have been general throughout the county, the Antioch supervisor's salary is the smallest, with one exception.

Rosing said today that he believed that "my long record of faithful service to the residents of the township and my experience in the job should assure me the support of the voters on next Tuesday."

Palenske is a comparatively newcomer to the community, having moved to Channel Lake about a year ago from Forest Park. He is a son-in-law of Herman Hess of Channel Lake, with whom he resides. He is now employed at Johnson Motors Waukegan plant, and before being employed there was a painting contractor. He is married and has two children, is a graduate of a civil engineering school and served in the South Pacific during World War II. He promises to devote his entire time to the job if elected.

No contest, in the balance of the ballot indicates that the vote will be very light. Robert J. Webb, who has served as road commissioner for the past term, is unopposed as is Ed C. Jacobs, candidate for election as justice of the peace. Jacobs will replace J. C. James, who passed away before his term of office expired. Dr. W. R. Williams and Eleanor Micheli are candidates for re-election as library trustees.

Severest Snow Storm of Winter Ties Traffic for Two Days in County

Probably the severest snow storm of the winter occurred Monday afternoon and night tying up traffic in the vicinity of Antioch for two days.

The snow, a heavy one, coming from the north with a 40-mile wind, fell to the depth of several inches from noon to late at night and the strong wind Tuesday kept it drifting. In Antioch, the speedy and persistent efforts of the highway men, kept the streets clear, but in the state and county roads the work wasn't quite so efficient.

Rte. 173 both east and west of Antioch was blocked. Truck men and other motorists were forced to spend the night at farm houses when their cars and trucks stalled. The Bert Doolittle, Curtis Wells and Steve Jesevic families on Rte. 173 were hosts to quite a number of motorists one night. State employees explained that a large bus which had stalled on 173 was responsible for the delay in clearing this important route.

The Antioch Waukegan bus got off the highway Tuesday morning west of Antioch and had to be pulled back on the pavement. Miles of telephone lines were down on Rte. 173.

Not until Wednesday noon was Rte. 173 opened. Grand Ave., between Gurnee and Rte. 45 was closed at times with cars stalled in one-way traffic, and much traffic was routed over Belvidere rd. into Waukegan.

With the biggest soybean crop in Illinois history likely this fall, many state farmers are building or planning to build bin storage space in their 1947 new construction plans, says A. J. Suratt, Illinois agricultural statistician.

Reports received while gathering data on the state's potential crop production indicate that farmers are more than ever soybean storage conscious, Suratt said. They believe that the huge crop, plus possible transportation tie-ups and the probability of over-loaded elevators, may depress harvest-time prices.

The Trend In Retailing

A number of retailers' associations have recently held their annual conventions. Experts in various phases of merchandising have thoroughly discussed consumer preferences, dealings with manufacturers, the price situation and other problems involved in the complicated business of turning raw materials into goods on store shelves. And the general tenor of feeling is that the consumer will be offered more and better goods—and that further price advances must be opposed.

Pricing of goods, as one resolution observed, is the joint responsibility of manufacturer and retailer—with the consumer making the ultimate decision on whether the price is right. It does no one any good to produce commodities which people won't buy because they think they're overpriced. And retailers are working to see that goods in that category disappear from the channels of trade.

The effort of retail business to improve quality is an important, and often overlooked, service to the consumer. It is bearing fruit now. The shoddy merchandise which was unavoidable during the war years is going rapidly into limbo. Retail buyers are insisting that manufacturers provide the best possible article for the money—and they are refusing to buy when they think that isn't being done.

Retailers are also stressing greater efficiency and courtesy on the part of employees. The curt, disinterested clerk of the war years, who couldn't be fired because there was no one to take his place, is disappearing.

* * *

The Hope of the World

The hope of the world lies in the American government—and the American private enterprise system which underlies it. As our international commitments grow, more and more peoples in nations which bore the full physical brunt of war look to us for succor.

Already, American industry has brought new

vistas of prosperity and progress to remote parts of the world. The work of the Arabian-American Oil Company in Saudi Arabia is a dramatic example of this. The company is financed and operated by a group of four United States oil companies. It is pouring gigantic sums—the total may run as high as \$300,000,000—into Saudi Arabia to develop hitherto untouched oil resources that are there. In the process, it has brought modern medicine to the peoples of the region. It has started great agricultural experiment projects. It has built model villages and good roads. Thus, with free enterprise at the helm, social progress and economic development go hand in hand—precisely as they have always done here at home.

In the coming years American industry in many fields will carry on work of this nature. The techniques developed in the new world will be applied to the resources—and the rehabilitation—of the old. Millions of people, who know little of American ideals of liberty, will see the superiority of the free enterprise system over the totalitarian system—regardless of what name it wears. The American oil industry is a product of free opportunity upon which our nation was built.

The Low Down From Hickory Grove

Day by day somebody bobs up with a new cure for what is ailing us—it is talk, talk, talk. We go to work and help win a war to make the world safe for democracy—but the talk keeps right on. Our ailments are even getting more aggravated as more and more quacks feel our pulse—and prescribe.

An to add insult to injury—and to accent what kind of sucker we are—the theory boys are eating regular and plenty, and a general good time is being had by all of them, as we watch the income tax man snip off a sizable corner of our check on payday—every payday.

And now I am gonna take a hand—and do some diagnosing and prescribing. Proceed, says Henry. There are 3 things, I says, gnawing at our vitals. The first, is the law that makes it legal for a strong-arm organizing gent to take over labor—lock, stock and barrel—and push the boss and his regular and old-time men off the sidewalk. Our second ailment is the socialistic germ that is undermining our strength and which, if it breaks out all over, will put us flat on our back.

And the third thing we need—it is a Congress that will get off the dime and wade in and do something about making our own U. S. A. safe for democracy versus just in Europe, Africa and Asia.

Yours with the low down,
JO SERRA

astery of Hales Corners, and Father Leonard, pastor of the Benedictine Monastery at Benet Lake.

There will be religious instruction for children of grade school age at the Holy Name church Saturday afternoon. Thursday evening at 7:30 Catholic students of high school age will meet at the Holy Name church for the meeting of the Catholic Youth club.

The Union Free high school P. T. A. will meet at the high school Monday night, April 7.

In the Class basketball tournaments the Seniors defeated the Juniors 45-39. The Sophomores were in third place as they defeated the

Over the weekend Mr. and Mrs. Nick Fischback, of Chicago, called on Mr. and Mrs. Ernest Otto and Richard.
Mrs. Ernest Otto attended a birthday party for Mrs. Kate Close, Chicago, at the home of her daughter, Mrs. Emil Jennisch at Antioch on Wednesday.
The mission services being conducted three times daily at the Holy Name church are largely attended. Father Charles A. Talsky, C. S. J., a returned Army chaplain is conducting the morning and evening conferences. The Mission will close on Sunday evening.

Recipe for a happy family...
1. TURN IN old, burned-out and wrong-sized light bulbs.
2. TAKE a heaping portion of bright new light bulbs in exchange.
3. MIX WELL into every room where your family reads, works, eats or plays.
4. ALLOW TIME for normal activities about the house after the family comes home tired that evening.
5. ENJOY their fresh zest for living with a brighter, cheerier home!

CHECK the lighting in your home today! You'll find many little unthought-of reasons for dad's tired eyes... junior's distaste for homework... and sister's reluctance to sew on that new dress she's making. Empty sockets, wrong-size and burned-out bulbs play no favorites—they rob every member of the family of adequate light. Make sure today that every socket in your home is filled with the proper-sized bulb. A home filled with warm, cheerful light makes the evening hours—when the family is free to relax and enjoy leisure hours together—the most pleasant part of the day.

***Take Advantage of Our Liberal Renewal Policy**
To all customers on light bulb exchange service there is no charge for replacing most sizes of standard, burned-out bulbs marked "PS of NI" or "Renewal Service."

SOCIETY EVENTS

Home Bureau Addressed By Adviser at Home of Mrs. Joseph Vachta

Mrs. Helen Volk, county home adviser, spoke on "China in the Home," at the meeting of the Antioch Home Bureau Wednesday at the home of Mrs. Joseph Vachta, with Mrs. Archie Shannon as assistant hostess.

Officers elected in February assumed their duties. They are Mrs. Eugene McDougall, president; Mrs. Robert Hess, vice president; Miss Bertha Schmidt, secretary and treasurer.

Chairmen appointed are Mrs. Lester Osmond, Sr., 4-H chairman; Mrs. James Van Cura, health and safety chairman; Mrs. C. E. Hennings, library chairman; Mrs. C. L. Kutil, activities chairman; and Mrs. George Peterson, recreation chairman.

Organization School For 4-H Club Leaders Arranged for April 8

An organization school for leaders of Home Economics 4-H clubs will be held at the Home Bureau office in Grayslake on Tuesday, April 8, at 1:30 p. m.

Mrs. Helen Volk, county home adviser and leader of 4-H club work for girls, will conduct the meeting. Leaders will receive information and supplies for organizing their clubs for the coming 4-H season. All clubs will organize in April and complete their project work in August. This means that most of the project work in clothing, foods and room improvement will be done during the vacation months. Club work also includes recreation, a camping program and participation in the County 4-H show and state fair. Any girl between the ages of 10 and 21 may enroll. Each club must consist of at least five girls and an adult leader.

Four-H club work furnishes young people with the chance to develop leadership through club and community activities.

All communities wishing to have a 4-H club should be sure to send their adult leaders to the Organization School on April 8, Mrs. Volk said.

Eugene Baethke, son of Mr. and Mrs. Elmer Baethke, came home from St. Therese hospital Saturday. Eugene underwent an appendectomy a week ago. He is doing nicely at home.

PARENTS OF SON
Mr. and Mrs. William Ferry are the parents of a son born Saturday, March 15 at St. Therese hospital.

Mr. and Mrs. Ernest Schelter and daughters and Mrs. Bell Hahn, of Chicago, spent Sunday, March 16, with Mrs. Mollie Somerville.

**PVT. WILLIAM E. HORTON
WITH THE EIGHTH ARMY**

Pvt. William E. Horton, son of Mrs. Violet Horton, East Shore, Bluff Lake, Antioch, has recently been assigned to the 19th Infantry Regiment, a unit of the 24th Infantry Division, for occupation duty in Japan. The 24th, known also as the "Victory Division," is now occupying the entire island of Kyushu, southernmost and third largest of the Japanese home islands.

Upon his arrival in the 24th Division areas, Horton found many improvement projects under construction. In an effort to make life overseas equal to that of a soldier stationed in the United States, the "Victory" Division has furnished its men with modern living quarters and the best recreational and amusement facilities available.

Pvt. Horton entered the Army on April 19, 1946 and joined the 24th Division on Dec. 23, 1946.

WANTED—150 DOZEN EGGS

Once a year as we approach the

Easter season, the Methodist church

of Antioch asks for contributions of

fresh eggs to be sent to Wesley Mem-

orial hospital as an Easter offering.

For the past three years this church

has topped all the churches of the

conference in this very needed field.

Last year we sent five cases (150

doz.) We should do better than that

this year. Begin now saving for

Wesley Hospital. Some have already

made their offering. Bring your to

the parsonage as soon as possible

and we will forward them to the hos-

pital at once.

Thank You,

Warren C. Henslee, Pastor

Announce Engagement

Mr. and Mrs. C. L. Stevens, of Spring Grove, Illinois, announce the engagement of their daughter Lucy Elizabeth, to Earle E. Harrison, son of Mr. Walter Harrison, of Burlington, Wisconsin. The wedding date will be announced.

LIBRARY NOTES

"My Three Years with Eisenhower," Captain Butcher's personal diary, is informal history of the highest quality. As a behind-the-scenes view of the persons and events of World War II, it gives us intimate highlights on leaders of the Allies and their views and plans for defeating the Axis. Destined to be a source book for future historians, "My Three Years With Eisenhower" was presented to the library in memory of Mrs. Hetta Stewart Douglas.

"Pere Antoine," by Edward F. Murphy who wrote "The Scarlet Lily," is a fascinating novel of New Orleans in the late eighteenth century. Pere Antoine, a young priest, failed in his attempt to stem the turbulent tide of the lawless city. When New Orleans became part of the United States, Pere Antoine absorbed a new philosophy of government and law, and became one of the city's best loved priests.

Card Of Thanks

I wish to thank all my friends for the many cards and gifts sent me while in the hospital.

Eugene Baethke

HICKORY

Miss Lilly Darby and Mrs. Dora Dibble arrived at the Bert Doolittle home Sunday morning from Florida, where they spent the winter months. Mr. and Mrs. H. A. Tillotson were Sunday dinner guests at the home of Mr. and Mrs. S. W. Ames in Gurnee.

Miss Josie Mann spent Thursday with Mrs. Will Thompson. Mrs. Vincent Stonis was an operative patient at St. Therese hospital in Waukegan last week.

Mr. and Mrs. William Edwards have sold their home and chicken farm on route 173 and moved to Milwaukee, Wis., to be with their daughter.

Mrs. Robert Taylor and baby son arrived in Chicago Sunday evening from Wayne, West Virginia, where they have been visiting the Homer Edwards family for the past three weeks.

Mr. and Mrs. Gordon Wells and Mrs. Nettie Wells called at the Ernest Wells home on Grand Ave., Sunday afternoon. They also called on Mrs. Stonis at St. Therese hospital.

Mrs. Eva Alling, of Waukegan, visited the Bert Edwards family Sunday afternoon.

Mr. and Mrs. Oliver Hunter, of Kenosha, called at the Wilbur Hunter home Sunday afternoon.

Mr. and Mrs. Max Irving celebrated their silver wedding anniversary on Friday, March 14, with a group of relatives and friends at their home in the evening.

(Written for last week)

Mrs. William Strahan and daughter, Kathleen, Mr. and Mrs. Emmet

King were dinner guests of Mr. and Mrs. G. A. Lange at Hebron Sunday. Donald Irving left for a vacation trip to Mexico Sunday.

The neighbors and friends of Mort Savage gave him a surprise party Thursday evening, March 6, the occasion being his 74th birthday anniversary.

Mr. and Mrs. Wilbur Hunter and son, Jerry attended the Herner wedding at the Methodist church in Waukegan Saturday.

Grain Storage

Improved, prefabricated grain bins developed through research by the department of agriculture now provide a practical means of long time storage of grain on farms.

Burn Easily

Molasses and sorghum, like honey, burn easily, so any foods containing them should be cooked at a lower temperature than when sugar is used.

Smart Pests

Larvae of some fruit pests avoid stomach poisons by discarding the first few bites of tainted food before burrowing in poisoned twigs or fruit.

Control Hyacinth

The Louisiana legislature has appropriated \$100,000 for the control of water hyacinth, major weed pest in the waters of that state.

Get Most From Vegetables

To get the most good from vegetables, eat some raw, some cooked; cook quickly; use all the juices; store to keep them crisp and plump.

Card Of Thanks

I wish to extend a sincere "Thank you" to all my friends for the lovely cards, calls and gifts sent me during my recent illness.

Suspect Boys of Threats

Phoned to London Police
LONDON. — Scotland Yard theorized that either a dangerous maniac or a group of irresponsible boys were telephoning anonymous warnings that various key buildings in London would be blown up. In four days 21 such calls have been received, but there was no report of terroristic violence.

Hand Without a Body Nabs Girls in Night

Mysterious Events Are Puzzle to Men of Science.

LANGLEY, ENGLAND. — One night last April an 18-year-old girl named June Buckland awoke, she said, to find a tall, misty figure standing by her bed. She thought it strange but, mentioning it to her family, she didn't believe it to be real.

Even so, the family soon got the idea there was something unusual about the 300-year-old house into which they had just moved. Strange knockings were heard. Strange moanings and creakings came out of nowhere.

Then one night last winter, June's brother, Jackie, 5, fell sick in the night. Their mother, Florence, got up to attend him. A hand gripped her wrist—and, she said with a worried frown between her eyes, there was no body attached to the hand.

"Two days later," Mrs. Buckland said, "I awoke and there was this misty figure standing by the fireplace. I put my head under the bedclothes, but felt I just had to look again. The figure was still there."

That's the way things have been even since in the troubled household of the Bucklands in this dreamy village near London.

Something pulls the bedclothes off sleeping members of the family . . . doors open and footsteps are heard—but nobody comes in. . . . Edna Shelock, 10, who lives with the Bucklands, found herself sleeping under the bed one night. She didn't know how she got there.

The British Society for Psychic Research said it planned to send a man around.

Relates How He Survived

Being 'Beheaded' by Japs

TOKYO. — An Australian soldier told the war crimes court that he had lived through a Japanese officer's attempt to behead him and eventually had crawled to safety after recovering consciousness buried in a shallow grave.

The soldier, Colin Fleming Brien, 23, was ordered to sit down with his feet and legs in the grave, his wrists were tied behind his back, and a towel was tied over his eyes. The officer, sword in hand, loosened Brien's shirt collar and bent his head forward.

"After a few seconds I felt a heavy, dull blow on the back of my neck," he continued. "I fell over on my side, then lost consciousness. When I regained consciousness, I was lying at the bottom of the grave underneath some wooden planks and clods of earth. I had a large wound in the back of my neck. I managed to crawl out, and staggered into the jungle grass, where I lay all day."

After three days he reached Singapore.

Bolt Saves Woman Hanging

From 11th Floor Hotel Lodge

PHILADELPHIA.—A thin, silken belt of a negligee saved a 32-year-old blonde from possible death as she hung precariously from an 11th-floor ledge of the fashionable Drake hotel.

The woman, who identified herself as Mrs. Helena Hall of Philadelphia, was rescued 15 minutes after she plunged through a closed window. The belt caught on a hook and held her suspended in midair, head downward. Three men pulled her to safety.

Police said the woman told them she was trying to throw a glass of water through the window which she thought was open. She lost her balance and fell.

Thieves Got \$600,000 Cash

And Gems in French Hotel

MAISONS-LAFITTE, FRANCE.—French police said that \$300,000 in American currency and jewelry worth another \$300,000 were stolen from Mrs. Lucienne Denitez-Resach, wife of a Puerto Rican industrialist.

The police said that burglars broke into the woman's room at a hotel in this resort town while she was at dinner and stole a casket containing the banknotes, two platinum bracelets, a five-row pearl necklace and clips.

Auto Driver Forgets His Wife

And Sets Off Police Alarm

BEDFORD, PA.—A "calling all cars and stations" alarm went out over the state police radio system to watch for a motorist speeding eastward in a convertible coupe.

Stopped by troopers, the tourist was surprised to hear that he had "forgotten" his wife in Bedford, 30 miles back. Sheepishly he turned his car and started back to get his wife and probably—as any married man knows—an ear beating.

Dr. A. C. Ivy New U. of I. Medical Activities Head

Dr. Andrew C. Ivy, new vice president of the University of Illinois, has instituted an expanded program of teaching, research, and service to the people of Illinois through the University's colleges of medicine, dentistry, and pharmacy and its hospitals in Chicago's west side medical center.

Dr. Ivy, head of the University's Chicago Professional Colleges and hospitals, is one of the world's leading physiologists and clinical investigators. He is author of more than 750 publications dealing with the gastro-intestinal tract, gall bladder, brain, and glands of internal secretion.

Born Feb. 25, 1893, in Farmington, Mo., Dr. Ivy was graduated from State Normal School, Cape Girardeau, Mo., and later received B. S., M. S., and Ph. D. degrees from the University of Chicago. He obtained an M. D. degree from Rush Medical College, Chicago.

After teaching at the University of Chicago and Loyola University, Dr. Ivy joined the staff of Northwestern University. From 1925 to Sept. 1946, when he assumed the newly-created position of vice-president of the University of Illinois, he was head of the department of physiology and pharmacology at Northwestern.

He is a member of more than 25 national medical societies. He is the discoverer of two hormones—cholecystokinin and enterogastrone, the first a substance which forces the gall bladder to contract, the second a recently-announced cure for peptic ulcers.

Dr. Ivy held numerous technical consultant capacities during the war and was director of the Naval Medical Research Institute at Bethesda, Md.

In 1946, he served as American representative of an international commission to study Nazi war-time medical experiments, and served as medical adviser to testify on the ethical principles of medical investigations, studies, and experiments conducted by Nazi doctors on trial for war crimes.

Dr. Ivy consistently cites the need for continued and expanded medical research in the interest of humanity. His particular interests, aside from the gastro-intestinal tract and the gall bladder, are geriatrics (diseases of the aged), chronic illness, cancer, analgesia, and the need for animal experimentation in all phases of medical research.

Removing Wax Drippings

In removing candle wax drippings from rugs and tablecloths, scrape off all wax you can with a dull knife. Next sponge with carbon tetrachloride. Should any colored stains be left, rub lightly with a mixture of two parts water to one part rubbing alcohol. To guard against fading, however, the latter solution should first be tested on an inconspicuous part of the rug.

Accidents and Eyesight

One authority estimates that industrial accidents alone are responsible for 15 per cent of the blindness in this country. Besides these, there are the accidents that happen in the home, on the road, and on sidewalk and playground. Of the young people in schools and classes for the blind, 7 per cent are there because their eyes were injured by balls, stones, sticks, scissors, knives, whips, pea shooters, firecrackers, or BB guns.

Artificial Fiber

An artificial fiber from which bristles for brushes can be made is now being manufactured from casein. The bristle is made by forcing a mixture of casein and water through a suitable die, and then subject that to finishing operations. It is particularly adapted to construction of paint brushes, since the casein bristle is resistant to oils and organic solvents.

All This—And Teaching Too

Everyone knows the University of Illinois provides instruction for thousands of young people—more than 28,000 of them this year—but few realize that, over and above teaching, the work of the University is putting many millions of dollars into the pockets of the citizens of the state and nation each year. These cash returns are the applied results of the research work the University carries forward constantly. For instance:

... The value of Illinois soybeans last fall exceeded 150 million dollars, a direct result of University work started 30 years ago;

... Money saved in more economical heating of homes by applying facts proved by the University, save owners more than \$100 million yearly;

... The University pointed the way in legume inoculation which on Illinois cultivated acreage extract \$32 million of nitrogen from the air annually;

... The University developed the blue print for synthetic rubber as a result of its discoveries in 1925; during the war 50 different kinds of such rubbers were produced on the campus;

... The Illinois system of soil fertility which insures increased rather than diminishing yields, and the use of limestone to increase production, are worth \$50 million annually to the farms of the state;

... Dairy farmers of Illinois each year receive in increased profits as a result of University work, an amount that would operate the dairy department for 36 years;

... The University was the first to discover the reason for boiler embrittlement, and later a remedy, worth \$10 million yearly to the Chicago industrial area alone;

Early in the war the University was able to tell the Navy in 90 days what it would have taken 50 years to learn on the high seas—the dependable comparison in the use of rivets vs welding in armor plates.

Many other University findings cannot be measured in dollars and cents. The first sound-on-film motion pictures; the forerunner of the "electric eye"; its work for thirty years in determining the breaking points of iron, steel and other metals; the establishment of performance characteristics of concrete, railway rails, car wheels, building beams; these and scores of others touching the daily lives of almost every person, came from the University of Illinois.

Could the University have each year a small fraction of the value of its research contributions, it would never have to ask the taxpayers for a penny.

Keeping Bread

Keeping bread in the refrigerator will hold off the growth of molds. Wrap it in moisture-proof paper or put in a covered container.

Life-Saving Stations

The first government life-saving stations, which were just boat houses, were erected along the coast of New Jersey in 1848.

Gravy Spot

Thickened gravy which has dried on the cloth should be scraped off with a dull knife. Then sponge the spot with cold or lukewarm water. If a grease spot remains after the fabric dries, sponge with a grease solvent, rubbing gently between the hands. Then wash in warm suds and rinse.

Books for Blind

Congress has authorized \$1,125,000 a year for books which are distributed to adult blind persons by the Library of Congress through 27 regional libraries. Of this amount, \$200,000 is for the publication of books in braille and other raised types; the rest is for talking books and the maintenance and replacement of government-owned talking book machines. One of these costs \$60, but a blind person may borrow one free.

3 MINUTE FICTION Mother's Love

By Elaine Francis

WNU Features.

AS A baby-sitter she certainly got around, Minerva reflected ringing the bell of the imposing Labonn home. All types of doors had opened for her in the past few months, due to the shortage of servants, but none more interesting than this one.

"Come in, my dear Miller," Tanya Labonn cried. "You're just in time to watch me rehearse."

Minerva gaped. Not at the "Miller" which Mrs. Labonn always called her in continental fashion, but at Tanya's exotic beauty.

Chattering rapidly, for the former ballerina was always friendly, always informal, Tanya led the way through the spacious drawing room to the equally large sunroom stripped of all its furnishings except the radio-phonograph. This she snapped on and began to dance.

"Miller, you like it?" Tanya inquired. "So does Billy Dunn. He was my agent before the war and tomorrow night he brings movie scouts and big shots to our show. You know about the benefit, yes?"

"A plush, lush affair, they call it," Tanya giggled. "But it is luck for me. All those years when Don, my husband, was at war, I could not dance. I had to work for victory. But now . . . Don does not mind that I become a glamour puss and go to Hollywood. He says to spread the wings before it is too late. Ah, Bonnie . . ." She swooped over to the door and kissed her daughter.

Suddenly it seemed incredible to Minerva that this 13-year-old was Tanya's child. The contrast was painful. Bonnie's mudblonde hair,

Minerva gaped at Tanya's exotic beauty.

the braces on her teeth, the dainty frock accentuating adolescent bulges. . . . And her face was sullen and dull. What was wrong?

IT WAS not until late that night that Minerva learned the answer. People always confided in Minerva, once they had pierced her shabby exterior, and Bonnie was no exception. "Mother is gorgeous, isn't she?" she asked wistfully. "A cinema cinch, her agent says."

Minerva's movie going had been limited, but she agreed heartily. "It's selfish," Bonnie cried, "but I wish she'd flop. I loved our life just as it was—now everything is spoiled. Mother gets younger every day and I feel more like a Mack truck. . . ."

Minerva could not sleep that night, thinking of Bonnie's unhappiness. At this particular stage she was apt to be permanently affected by her mother's fame. Previously, she had been adaptable. A few more years and she would be self-reliant. But right now. . . . If only she could help the child. There was one way, tomorrow. . . . She tried hard to dismiss the idea.

Nevertheless, at four the following afternoon, the plan was in motion. Having sent Bonnie to the summer house for her supposedly mislaid spectacles, Minerva searched for the phone. Strangely, it seemed to have moved, but she found it just as Tanya returned from the beauty parlor. Picking up the receiver, Minerva said loudly, "I feel sorry for Bonnie, claims it will ruin her life if Tanya makes a hit. Sure, she's hipped on Hollywood. Oh, 'bye.'"

Is New Dean of U. I. Med. College

Dr. John B. Youmans, noted medical clinician, teacher, and scholar, has been named dean of the University of Illinois College of Medicine in Chicago.

Dr. Youmans, born Sept. 3, 1893, in Mukwonago, Wis., was graduated from the University of Wisconsin in 1916. He obtained his M. D. degree in 1919 from Johns Hopkins Medical School. From 1927 to late 1946, he was associated with Vanderbilt University.

In 1940-41, he served as a member of the Rockefeller Foundation Health Commission to Europe. In April, 1944, he entered the U. S. Army as a colonel, medical corps, director of the nutrition division, preventive medicine division, Surgeon General's Office, Washington, D. C.

He subsequently served in China, the Pacific, and the European theater. Last summer he was American medical nutrition member of an allied commission which surveyed zones of occupation in Europe. The survey was repeated, with Dean Youmans as a member, in December of 1946. Dr. Youmans was largely responsible for establishing the system of period surveys.

Kills Mealy Bugs

If you find mealy bugs, red spiders or aphids on any of your house plants, try spraying them with a solution made of one teaspoonful of nicotine sulphate in a gallon of water in which a one-inch cube of laundry soap is dissolved. Some of the mealy bugs will have to be picked off the plants by hand, with a splint or toothpick.

Molasses Rich in Iron

Molasses, a by-product of the sugar industry, is rich in iron and experiments have shown that this iron is highly valuable for body use. Another contribution of molasses is its spicy flavor which makes it especially well liked in ginger bread and spiced cakes.

**PRICED FOR THE FAMILY BUDGETS!**

Easter outfits for the nursery set . . .

all ready in our children's department

Bring them in for their manly little

eton suits, pretty party dresses,

adorable coats, separates. You'll love

their prices too . . . all tuned especially

to family budgets. Also in Juniors 9 to 17.

TEACHER'S PROBLEM

By Chris Matthews

WNU Features.

THE only way to do anything is to go ahead and do it, my daddy used to say. And my daddy is a wonderful guy, Miss Evans. He's the best daddy in the world, and I know. That's the reason I'm writing this letter to you—because of my daddy. I'm writing to you because I don't want to hurt him. And I know you can help me, if you want to.

You will, won't you, Miss Evans? You've given me a good scolding many a time, but I remember the last one mostly, because it was only yesterday, just before arithmetic class.

I had forgotten to do my arithmetic lesson. I was glancing through the problems and saw that if I started on them now I wouldn't get three problems solved before class would begin. So I slipped a note to Mary Jane behind me, asking her if she'd let me take her copy. Mary Jane is the smartest girl in the class, and we're pretty good friends, so she let me take it.

I started copying her work, and believe me, Miss Evans, I really felt guilty doing it. I felt like a traitor. I was sure I could have done the problems myself if I had the time, because arithmetic is one of my easiest subjects.

But I copied the assignment anyway, and when I started to slip the papers back to Mary Jane, that's when you looked up. Your eyes met mine first thing, then moved to the papers in my hand.

I didn't know what to do with myself, then, I was so scared. 'Shamed, too, I suppose. I didn't know whether to drop the papers on Mary Jane's desk, or whether to put them back on mine. I guess you know how I felt.

Well, I hurried, and I caught the bus despite the deep snow.

"Well, you know what I did, because you told me to do it.

"Dickie," you said, "please bring those papers here to me." I hesitated a second. I felt everybody's eyes on me, and I must've gotten awful red, because that's how my face felt. I got up slowly, and walked up and handed the papers to you.

You looked at the first page, and you said, "So—you're copying Mary Jane's arithmetic assignment. Is that the kind of work you make a habit of doing, Dickie?"

"Oh, no, sir," I said. I know I should have said "No, ma'am," but I didn't think of it then. "I've never copied anybody's work before," I said. And that's the truth.

"All right. But you must learn never to copy someone else's work, Dickie. I'm sorry, but you are going to stay in school tonight, and do your arithmetic lesson."

YOU knew what that meant as well as I did. It meant that I would miss my bus—and we live three miles from school. That's a long walk when it's winter and snowing.

I was hardly through with my second problem when you said "Dickie!"

I looked up. "Dickie," you said, and you were smiling a little, "get your work together and take it home with you. You're leaving."

My heart started to pound in my chest. "You mean it?" I asked.

"I mean it," you said, and you were still smiling. "You better hurry, if you want to catch the bus."

I never told daddy about that, either. I almost told him a couple of times while he was helping me on my model plane after supper, but I didn't. Finally, he said:

"It's your bed-time, son. You want to get up fresh and ready for school, don't you?" And I said "sure, daddy," and went to my room.

I guess I was half asleep when I heard voices downstairs. It got me wide awake. I crawled quietly out of bed and put my ear close to the floor to listen. And that was when I heard you saying to daddy: "I'm sure that Dickie and I can get along swell together, Dick. I have a feeling that he likes me, and I like him. I like him very much. Matter of fact, probably as much as I love his father."

You laughed then, and daddy said, "I thought I'd better not tell him about us right away, but I suppose now it'll be all right. I'm sure you'll be a wonderful mother to him, Ann, and he a good son to you. He's a good boy. But who should know better than you? You're his teacher. You're with him more than I am."

You see? Please don't tell my daddy, will you, Miss Evans?

HEALTH HINTS for LIVESTOCK

PREPARED BY AMERICAN FOUNDATION FOR ANIMAL HEALTH

MORE SWINE LOSSES FROM BRUCELOSIS

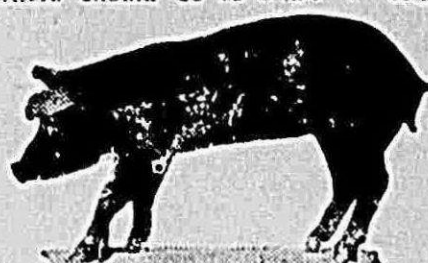

So much publicity has been given Bang's disease (brucellosis) of cattle that the seriousness of this same disease in swine is often overlooked.

More than 20 percent of all farm droves of swine harbor brucellosis, according to a recent survey. The losses in pig production are enormous.

One striking contrast between cattle brucellosis and swine brucellosis is that the latter is spread by infected boars. A single infected boar, even though he shows no external symptoms, can infect all sows on the farm. Diseased sows may lose their unborn pigs very early, so the owner may not even be aware of the loss. Again, sows may carry their pigs almost full time, and then give birth to still-born or weak pigs which die.

Swine brucellosis may also result in serious destruction of the bones of affected animals. Paralysis may result from damage to the backbone. To combat this disease, veterinarians recommend that weaned pigs on infected farms be kept separated from adult sows and boars.

Before they reach breeding age, a blood test of all sows is advised. Owners should be especially careful.

Crippled by bone loss of leg bones.

about adding any newly purchased boars or sows to their home herds without blood testing.

While the cattle strain of the germ very rarely, if ever, infects swine, the swine strain of the germ can and does infect cattle. For this reason, dairy men should not keep swine in the same lots with milking cows.

Modern veterinary science has developed a number of ways to cope with swine brucellosis losses and if any suspicion of the disease exists, skilled assistance should be consulted at once.

Horses' Legs Lock

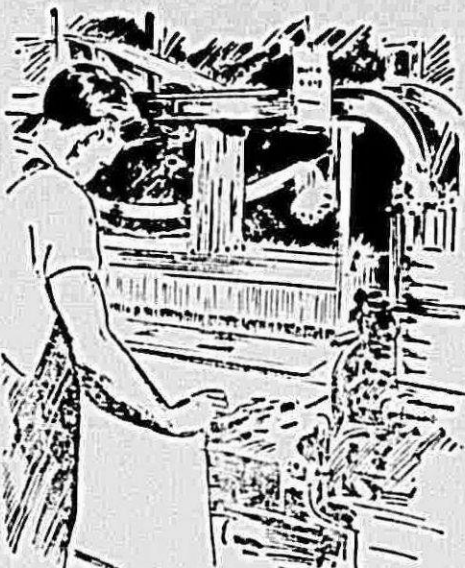

Horses can sleep standing up because their legs are provided with muscular mechanism which causes them to lock, making a horse stand as if he were on stilts.

Feast of the Roses

In Persia a yearly festival is held called the "feast of the roses" which lasts as long as the roses bloom.

Behind Your Bonds

Lies the Might of America

COTTON TEXTILES

The cotton-textile industry has spearheaded factory growth in North Carolina from 1880 to the present. Centered in the Piedmont area, coarse yarns were spun at first but now medium and fine textures are turned out. It is a 50 million dollar business. All the world will need these products which will add to the Nation's wealth to back the Savings Bonds you buy.

U. S. Treasury Department

Uncle Sam Says

Supposing you and your neighbor met at the grocery's and actually did and said the things you see going on in this scene. You probably would say "Quit your kidding, Uncle Sam. They must be two other fellows, not me and Tom." Actually, friend, there are not enough consumer's goods for the dollars Americans own. There is more need now than ever before for you to save every dollar possible from the buying market. Buy only what you really need. Put every extra dollar into United States Savings Bonds.

U. S. Treasury Department

Cattle Feeds

Of the total feeds consumed by beef cattle, 78.7 per cent is grass, hay and dry roughages. With lambs, it is 95.6 per cent.

Cloud Meter

An electrical cloud meter will aid flying weather stations in determining the severity of icing conditions.

Pioneer Dairy Farmer

In 1852 P. H. Smith of Elgin, Ill., shipped 17 gallons of milk to Chicago as the first attempt at exclusive dairy farming in Illinois.

Milking Machines

Experimentation has shown that an average milking time of three minutes is sufficient with mechanical equipment.

Home Danger Center

Thirty-five per cent of all accidental deaths are due to accident on home premises.

Helping Hand

According to an old Polish proverb, "the place you'll most often find a helping hand is at the end of your arm."

Avoid Fire Hazard

Clean out the chimney flues and inspect them to avoid fires in cold weather.

300 Million Dollars Worth of Bonus Bonds Will Go On Sale May 1

Three hundred million dollars worth of Illinois veterans bonus bonds will be offered for sale by the state service recognition board on May 1. This will be the first offering of bonds out of the \$385,000,000 bonus bond issue approved in a statewide referendum last November.

The bonds authorized for sale May 1 will be of \$1,000 denomination, maturing in annual series over a 25 year period starting two years from date of issuance. The Illinois bonus act provides that the bonds shall be sold to the highest and best bidders on sealed bids, for not less than par and at interest not exceeding two per cent.

The service recognition board is composed of Governor Dwight H. Green, chairman, State Treasurer Richard Yates Rowe, and Major General Leo M. Boyle, the adjutant general.

Meat From Cattle
A 750-pound beef will yield about 200 pounds in hindquarters and 220 pounds in forequarters—a total of 420 pounds.

Refrigerator Shelves
To remove rust from refrigerator shelves, clean them first with a mild scouring powder and hot water, then cover them with a thin coating of paraffin.

Old Shoe Store
Learned's shoe store is still doing business at the same old stand just off historic Dock square where it was founded in 1799.

Storing Butter
The best place to store butter is in a refrigerator where the temperature is always below 10 degrees or, better still, below zero.

Nylon Family
The word nylon is a generic term and not a trademark. Like "wood" or "glass," it designates a family of related compounds, which may vary as to properties, form or use.

Heavy Coal Users
Railroads consumed 22 per cent of the total bituminous coal production in 1945.

'Look Jimmy—
here comes
our Telephone!'

LAST YEAR, more than 10,000 families in the Illinois Bell rural areas welcomed the telephone into their homes.

This year we hope to connect even more new telephones in rural areas we serve. As fast as we can obtain the needed equipment, the convenience and protection of telephone service will be extended to all who want it. So rapidly has installation work proceeded that, at the present rate of speed, we will accomplish in two years our goal of 21,000 telephones—originally scheduled as a three-year job!

We're improving rural service too! More customers have fewer rings of other parties on their lines. Last year over 5,000 magneto telephones were replaced with modern, crankless instruments.

We intend to make our rural service the best in the world.

New Soil Testing Farm Planned at Libertyville; White Farm Inadequate

Lake County is to have a new soil testing farm to guide its future farm production research.

Through arrangements made by Farm Adviser, Ray T. Nicholas, Lake County; A. L. Lang and Ernest Walker of the University of Illinois College of Agriculture, and Gordon Flint, of the U. S. Soil Conservation service, the Homer Havermale farm of 300 acres near Libertyville will be the site of the cooperative project.

Starting next spring the state and federal agencies will begin an extensive study of soil conservation, experimentation in fertilizers and crop variety which will serve as a guide to farming in the Lake County area.

While the Havermale farm now operated by Michael Havermale, son of the owner, has 300 acres, the experimentation will be mainly on six acres of a 100-acre plot that Havermale recently purchased next to his 200 acre plot.

The 100 acres had been tenanted over a period of many years and the soil has become badly depleted.

The six acres will be divided into several small plots and various treatments started to test out for best results. This will be carried on over a period of many years and the best methods of soil treatment will be rec-

commended to other farmers in the county from time to time.

Lake county already has one experimental place at the George White farm near Antioch, which has been in use since 1902 by the University of Illinois. The plot is only one acre and is too small for the purpose now needed.

Nicholas plans to start immediately in testing fertilizer on the Havermale farm as a whole, applying various type of fertilizers to the grain and corn crops.

Sand Lake Grade School District Consolidated With Lake Villa Dist.

As a result of a petition signed by two-thirds of the legal voters of Sand Lake school district No. 48, the school district has been annexed to Lake Villa Consolidated district No. 41, W. C. Petty, county superintendent of schools announced.

The Sand Lake one-room school house will be closed and the pupils from that school will complete the term at Lake Villa school.

The Lake Villa school is a four-room school provided with a gymnasium and is equipped to handle the additional students.

State Fair Aug. 8 to 17 To Have C. F. Becker as Business Administrator

The appointment by Governor Dwight H. Green of Conrad F. Becker, former state treasurer, as business administrator of the Illinois state fair marks a revision of state fair administration by setting up separate divisions for management and for promotion. Mr. Becker will head the business management division, and

William V. Ward, present manager of the fair, will direct the promotion division, handling advertising, attractions, and special features.

This changed set-up is in line with a recommendation of the board of state fair advisors, of which Senator Simon E. Lantz of Congerville is chairman.

The 1947 fair will be held August 8 to 17. A bill to provide free public admission to the fairgrounds is pending before the General Assembly, and

is favored by Governor Green. Extensive repairs and construction, in-

cluding improved roads, more park-

Lark Not a Lark
The meadowlark is not really a lark. It belongs to the species that includes American blackbirds and American orioles.

On Wagging
The ordinary dog wags his "tail" but the hound wags his "stern." An otter wags his "pole," a rabbit his "scut," a fox his "brush" and a deer his "single."

Potatoes Not Fattening
Potatoes are not fattening. It's the gravy, butter or other fat that "piles up" calories. One medium-sized potato has about 100 calories—no more than an apple or banana

U. of I. Can House Students At Galesburg

Dormitories, Classrooms, Dining Services, Recreation, All In One Unit.

One of the few educational spots in the nation not troubled by any form of housing shortage is the University of Illinois Undergraduate Division at Galesburg.

Here students live but a short distance from where they go to class—all dormitories, classrooms, and utilities readily reached by walking along pleasant, heated corridors.

Where to house overflow students—the mighty enigma at almost every college and university today—never troubles administrators at Galesburg. They have available 30 housing units with the extraordinary number of more than 300 private rooms and approximately 1,200 other accommodations of various types. For women students two complete housing units containing private rooms are in use.

All unit accommodations whether for students, faculty, or administrative staff have individual recreation lounges and study halls nearby.

One complete unit has been set aside for married veterans. Another 15 apartments, with three and four rooms and bath in each, are just about ready.

Blankets, bed linens, laundry of linens, maid and janitor service are provided by the University as part of the housing accommodations.

Rental costs for students range from \$52 to \$120 per semester depending upon whether they decide upon single or double rooms or live with other students in dormitory style.

There's more to going to college, however, than having a place to stay. At Galesburg, other living conditions are ideal.

The University dining hall, staffed by 38 full-time employees, offers nutritious, well-balanced "big" meals three times a day on a non-profit cost basis. Estimated cost of student meals is \$1.50 per day. A second wing of the cafeteria seating more than 350 has been made available to students and faculty.

Always a center of activity is the Snack Bar which serves meals and light lunches at all hours. Students gather here between classes for a soda or "coke" and for Saturday afternoon dances.

Right next door to where students attend classes are the other facilities which complete living needs. In this central location is the campus bookstore, suppliers of all necessary study materials, magazines, novelties, and all "drug store" incidentals. In this area also are the barber shop, dry cleaning service, post office, and laundry.

Chicago Groups Aid Activities Of U. I. Branch

Situated near Chicago's "Loop," the Chicago Undergraduate Division of the University of Illinois at Navy Pier has developed a program to take full advantage of the city's cultural and social facilities.

The Art Institute of Chicago, on an indefinite loan basis, has given to the Undergraduate Division at Navy Pier 25 pieces of art work, among them 16 original Greek and Roman stone fragments. These pieces will enable the students of architecture to study the various orders from the original Greek and Roman fragments; art students will use the pieces for work in still life.

The Museum of Science and Industry, as well as other museums in the Chicago-area, has co-operated with the University of Illinois by arranging special exhibits as teaching aids for both faculty and students of the Navy Pier branch.

Theaters, lecture and concert halls, have extended special low rates to the faculty and students of the Chicago Undergraduate Division.

3 of 4 Students On Navy Pier Are Veterans

A veteran—age 20 1/2, single, a native Chicagoan, a graduate of a Chicago high school, and primarily interested in engineering or pre-professional training—that is the typical student among the 3,846 freshmen and sophomores enrolled in the new University of Illinois undergraduate Division at Navy Pier, Chicago.

A survey of the student body shows:

—9 out of 10 students are men (3,403)
—3 out of 4 are veterans (2,856).
—11 out of 12 are freshmen (3,534).
—15 out of 16 are unmarried (3,590).

—11 out of 12 are Cook County residents (3,554 Chicagoans).

At the new branch of the University of Illinois which offers the first two years of work in liberal arts, commerce, engineering, and architecture, the largest enrollment is in liberal arts—1,696 students. Engineering (including architecture) ranks second with 1,350 students, and commerce has a total enrollment of 800.

A further breakdown shows 405 women enrolled in liberal arts, 10 in engineering, and 28 in commerce.

Three hundred and fifty-eight students were formerly students of the Urbana-Champaign campus of the University. 870 are transfers from other colleges and universities, and 2,545 are taking their first college-level courses.

All but 303 of the 3,846 students indicated church affiliations.

Prevent Winter Falls

Sprinkle salt generously on icy walks or mix salt with sand, gravel or cinders to prevent winter falls.

Deadly Salt

Barium carbonate in precipitated form is an odorless and tasteless salt, very slow in its killing action. It is deadly poison to all animals.

Beauty Hint
Make sure your face is washed up before it is made up!

Farm Income
Farm income is the product of total farm goods multiplied by the price per unit.

Soviets Study U. S. Books
Soviet Russia purchased during 1946 over \$125,000 worth of American technical books of all publishers.

Rails Support City
